RE: Removal of the Tar Boiler
Schreiber/Caravan Drum Site

Dear Mr. Rosa,

I have received December's progress report from Steve Nwabuzor of Engineering Services, Inc., regarding the above referenced site. Accompanying the report were photographs which I believe were taken by you during removal of the tar boiler, and the subsequent recycling of its contents. In my conversation with you on December 4, 1992, and my letter to Mr. Nwabuzor dated December 15, 1992, I agreed to allow the boilers removal from the site provided I receive video or photo documentation of activities. The photographs I have received do not include dates or any descriptions. Therefore, I am requesting that you provide me a detailed explanation of the process involved in recycling the tar boiler material and a complete description of each photograph with the corresponding date.

If you should have any questions please feel free to contact me.

Respectfully,

Peter Guria
On-Scene Coordinator
